EXPERIENCE

Addip Pvt Ltd

May 2025 – July 2025

Full Stack Developer Intern

- Developed and integrated REST APIs to transform backend data into structured formats, enabling real-time reporting across business operations.
- Built efficient data pipelines to support application analytics and processing workflows, reducing data latency for downstream consumers.
- Collaborated in an Agile team using Git workflows; participated in code reviews and contributed to scalable feature delivery across sprints.

PROJECTS

OfferPath – Job Application Intelligence Platform

Python, Flask, PostgreSQL, spaCy, scikit-learn

- Built a full-stack job application tracker with an NLP-powered resume analyser using spaCy NER and TF-IDF cosine similarity to compute ATS match scores between resumes and job descriptions.
- Engineered a keyword extraction pipeline using scikit-learn TF-IDF vectorization and Named Entity Recognition to identify skill gaps between resumes and job descriptions, enabling targeted resume optimization per role.
- Developed an interview question prediction module using prompt engineering with the Gemini API, alongside a Kanban-based application dashboard with Chart.js analytics tracking funnel conversion across Applied, Screening, Interview, and Offer stages.

NeuroLearn – AI-Powered Adaptive Tutoring Platform (In Progress)

FastAPI, React.js, NumPy, Pandas, Scikit-learn, Google

Gemini API, JWT, Tailwind CSS

- Developing an AI-powered adaptive learning platform that personalizes quizzes and study plans by analyzing student performance and identifying knowledge gaps using Deep Knowledge Tracing.
- Implementing a FastAPI backend with JWT-based authentication, RESTful APIs, database integration, and role-based access for students and teachers.
- Building an adaptive quiz engine integrated with the Google Gemini API to generate Bloom's Taxonomy-based questions and detailed AI-powered explanations based on student mastery levels.
- Designing a spaced repetition system using the SM-2 algorithm to schedule personalized review sessions, improving long-term knowledge retention and learning efficiency.
- Creating interactive React dashboards with progress analytics, mastery tracking, performance visualizations, and teacher insights for monitoring class-wide learning trends.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL

Web & Backend: HTML, CSS, Node.js, Express.js

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Feature Engineering

Databases: MySQL, MongoDB, SQL Queries

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS,

Tools & Platforms: Git, GitHub, VS Code

EDUCATION

SRM University, Andhra Pradesh

Aug 2023 – Present

B. Tech in Computer Science and Engineering | CGPA: 8.22/10

Narayana Junior College, Guntur

2021 – 2023

Class XII (MPC) | GPA: 9.08/10

Narayana Olympiad School

2021

Class X (SSC) | GPA: 10/10

CERTIFICATIONS

- SAP Generative AI Developer
- MongoDB Certified Associate Developer
- SQL (HackerRank)
- Python for Everybody – Coursera / University of Michigan

LEADERSHIP & ACTIVITIES

Public Relations Lead – GeeksforGeeks, SRM University AP

- Coordinated 2+ technical events (coding contests, workshops) with 100+ student participation; managed external communications and structured outreach campaigns.
